

PONDY OXIDES AND CHEMICALS LIMITED

Generated: 13 June 2026
Sector: Industrial Recycling

Recommendation
Positive

Company Overview

Pondy Oxides and Chemicals Limited (POCL) is a leading Indian recycling company, referred to as 'The Urban Miners'. It processes scrap of Lead, Plastics, Copper, and Aluminium into value-added products. With 30 years of experience, POCL focuses on sustainable practices, technological upgradation, and a circular economy model, serving diverse industries including battery OEMs and automotive.

Investment Thesis

- Strong Financial & Operational Performance
- Levers for Strong Growth Outlook
- Target 2030

Financial Metrics

Metric	Value
Revenue	6,345
Revenue Growth	11%
EBITDA	551
EBITDA Margin	8.7%
PAT	356
PAT Growth	105%

Outlook

POCL is strongly positioned for consistent, long-term growth, supported by a clear strategic roadmap, strong financial health, disciplined operations, favorable regulatory environment, and experienced leadership. The company targets over 15% volume growth, above 20% revenue CAGR, EBITDA margins above 8%, ROCE over 20%, and over 60% revenue from value-added products by 2030.

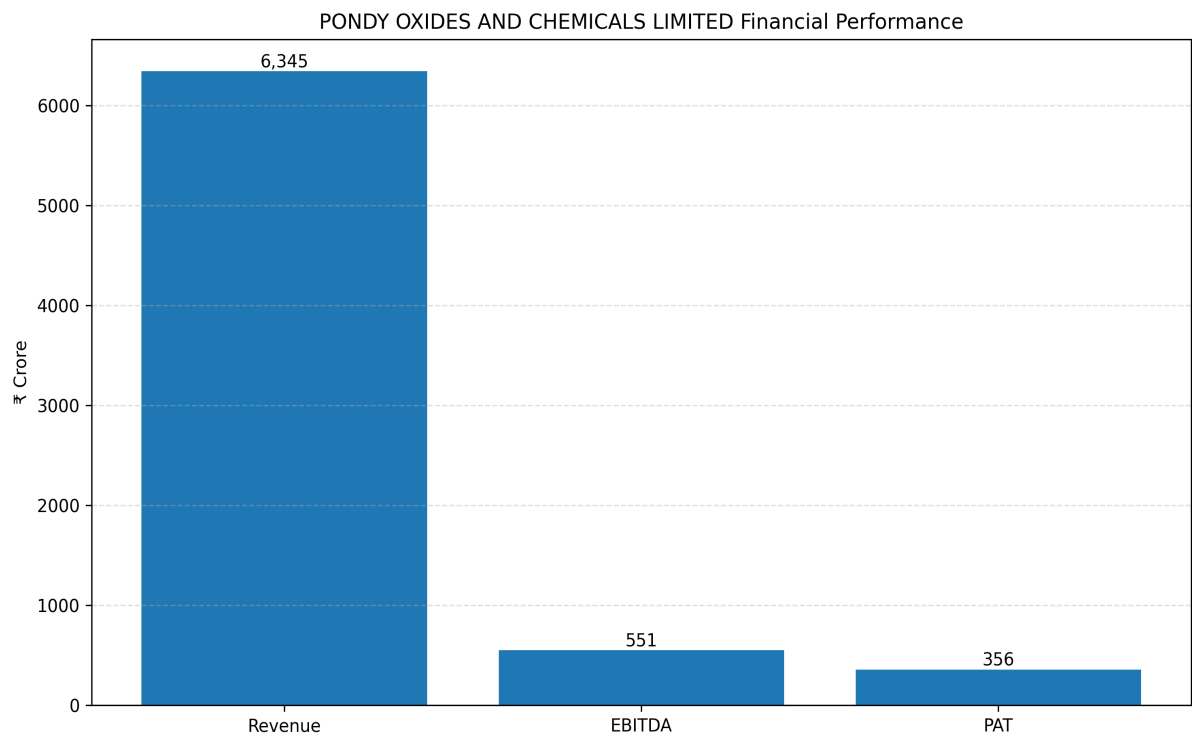

Key Highlights

- Achieved highest ever Quarterly and Half-Yearly Revenue, EBITDA, PAT and Margins.
- Successfully commissioned Phase 1 of the Lead capacity expansion project, adding 36,000 MTPA in April'25.
- Q2FY26 Standalone Revenue increased to Rs. 6,345 Mn., up 11% YoY.
- Q2FY26 Standalone EBITDA and PAT increased by 84% & 105% YoY, respectively.

Growth Drivers

- Capacity Expansion of existing verticals and diversification into new verticals like Lithium-ion and Forward Integration.
- Strict Government Norms of Battery Waste Management Rules (BWMR) & Extended Producer Responsibility (EPR) to increase domestic scrap availability.
- Improving operational efficiencies through improved technology and automation for enhanced margins.

Financial Performance

Risks

- Risks and uncertainties regarding fiscal policy.
- Competition.
- Inflationary pressures and general economic conditions affecting demand/supply and price conditions in domestic and international markets.
